Available in patented OSHA
Fall Protection Compliant
and Hurricane Protection
Compliant configurations

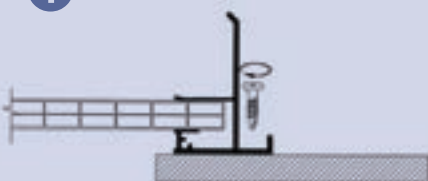

Multi-Link Glazing Systems

Starlight Glazing Systems manufactures a wide variety of glazing systems for a multitude of applications, both commercial and residential. Our Multi-Link-Panels combine durable and virtually unbreakable multiwall polycarbonate roof glazing with a high quality aluminum frame that is watertight and rust-resistant, offering all-weather protection from the elements. Pre-assembled to your specifications, Multi-Link-Panels are lightweight, easy to install and provide superior light transmission and heat insulation to help reduce energy costs.

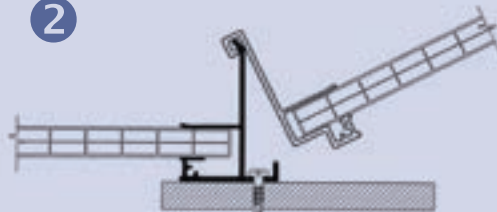

- Walkway covers
- Entrance and courtyard canopies
- Exterior shelters
- Clearstory
- Corridor glazing
- Curtain wall
- Greenhouses
- Patio covers
- Carports
- Canopy roofing
- Industrial roof lights
- Skylights

Multi-Link-Panels outperform in terms of cost, quality and appearance

The patented Multi-Link-Panel with its innovative modular fix and link bar system provides a cost-effective, long-term and low maintenance solution to pitched roof glazing. Installation is quick and easy. Panels are simply linked together and fastened, one by one. Multi-Link-Panels are available in up to 48" widths and up to 16' lengths.

Multi-Link-Panels are an attractive and functional cover for patios or porches.

Available in patented OSHA Fall Protection Compliant and Hurricane Protection Compliant configurations
